Methanol, HPLC

1. Product and company identification		
Product name	: Methanol, HPLC	
Product code	: MX0475	
Supplier	: EMD Millipore Corp. 290 Concord Rd. Billerica, MA 01821 1-978-715-1335 Technical Service Monday - Friday: 8:00 - 6:00 PM EST	
Synonym	: Methyl Alcohol	
Material uses	: Other non-specified industry: Analytical reagent.	

: 800-424-9300 CHEMTREC (USA)

Validation date

In case of emergency

613-996-6666 CANUTEC (Canada) 24 Hours/Day: 7 Days/Week

: 6/8/2012.

2. Hazards identification

:	DANGER! POISON!
	FLAMMABLE LIQUID AND VAPOR. VAPOR MAY CAUSE FLASH FIRE. VAPOR HARMFUL.
	MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED.
	CANNOT BE MADE NONPOISONOUS. CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
	HARMFUL IF INHALED OR ABSORBED THROUGH SKIN.
	MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: GASTROINTESTINAL TRACT, RESPIRATORY TRACT, SKIN, EYES, CENTRAL NERVOUS SYSTEM.
	WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.
	Keep away from heat, sparks and flame. Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or clothing. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use. Wash thoroughly after handling.
:	Liquid. [Colorless.]
:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
:	Dermal contact. Eye contact. Inhalation. Ingestion.
ts	
:	Toxic by inhalation. Irritating to respiratory system.
:	Very toxic if swallowed.
:	Toxic in contact with skin. Irritating to skin.
:	Irritating to eyes.
ects	
:	No known significant effects or critical hazards.
:	Laboratory experiments have shown mutagenic effects.
:	May cause teratogenic effects, based on animal data.
:	May cause developmental abnormalities, based on animal data.
:	No known significant effects or critical hazards.
:	May cause damage to the following organs: gastrointestinal tract, upper respiratory tract, skin, eyes, central nervous system (CNS).
	: : : : : : : : : :

2. Hazards identification

Medical conditions aggravated by overexposure : Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (section 11)

3. Composition/	information on ingredients		
Name		CAS number	% by weight
Methanol		67-56-1	100
4. First aid meas	sures		
Eye contact	: Check for and remove any contact lenses. for at least 15 minutes, occasionally lifting t attention immediately.		
Skin contact	: In case of contact, immediately flush skin w while removing contaminated clothing and shoes thoroughly before reuse. Get medic	shoes. Wash clothing befo	
Inhalation	: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.		
Ingestion	Call medical doctor or poison control center immediately. Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.		
5. Fire-fighting r	neasures		
Flammability of the product	: Flammable liquid. In a fire or if heated, a p may burst, with the risk of a subsequent ex and will spread along the ground. Vapors r travel a considerable distance to a source of may create fire or explosion hazard.	plosion. The vapor/gas is I may accumulate in low or c	neavier than air onfined areas or
Extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) o	r foam.	
Not suitable	: Do not use water jet.		
Special exposure hazards	: Promptly isolate the scene by removing all there is a fire. No action shall be taken inve training. Move containers from fire area if the spray to keep fire-exposed containers cool.	olving any personal risk or without risk	without suitable
Hazardous thermal decomposition products	: Decomposition products may include the for carbon dioxide carbon monoxide	ollowing materials:	
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate prote apparatus (SCBA) with a full face-piece op		
Special remarks on fire hazards	: Dangerous fire and explosion risk. Contair or when heated. Vapor may travel a consid flash back.		
6. Accidental rel	ease measures		

Personal precautions	: No action shall be taken involving any personal risk or without suitable training.
	Evacuate surrounding areas. Keep unnecessary and unprotected personnel from
	entering. Do not touch or walk through spilled material. Shut off all ignition sources. No
	flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide
	adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put
	on appropriate personal protective equipment (see Section 8).

6. Accidental release measures

Environmental precautions	: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up	
Spill	: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container.
7 Handling and	storage

7. Handling and stora

Handling

: Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage

: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container, protected from direct sunlight. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

8. Exposure controls/personal protection

Ingredient	Exposure limits
Methanol	ACGIH TLV (United States, 2/2010). Absorbed through skin. TWA: 200 ppm 8 hour(s). TWA: 262 mg/m ³ 8 hour(s). STEL: 250 ppm 15 minute(s). STEL: 328 mg/m ³ 15 minute(s). OSHA PEL 1989 (United States, 3/1989). Absorbed through skin. TWA: 200 ppm 8 hour(s). TWA: 260 mg/m ³ 8 hour(s). STEL: 250 ppm 15 minute(s). STEL: 325 mg/m ³ 15 minute(s). NIOSH REL (United States, 6/2009). Absorbed through skin. TWA: 200 ppm 10 hour(s). TWA: 260 mg/m ³ 10 hour(s). STEL: 325 mg/m ³ 15 minute(s). STEL: 325 mg/m ³ 15 minute(s). STEL: 250 ppm 15 minute(s). STEL: 325 mg/m ³ 15 minute(s). STEL: 325 mg/m ³ 15 minute(s). TWA: 260 mg/m ³ 16 hour(s). TWA: 200 ppm 8 hour(s). TWA: 200 ppm 8 hour(s). TWA: 200 ppm 8 hour(s). TWA: 260 mg/m ³ 8 hour(s).

Consult local authorities for acceptable exposure limits.

8. Exposure controls/personal protection

Engineering measures	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Personal protection	
Respiratory	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Hands	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: neoprene
Eyes	 Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Recommended: safety glasses with side-shields
Skin	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: lab coat
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and chemical properties

Physical state	: Liquid. [Colorless.]
Flash point	: Closed cup: 12°C (53.6°F) Open cup: 15.85°C (60.5°F)
Auto-ignition temperature	: 464°C (867.2°F)
Flammable limits	: Lower: 6% Upper: 36.5%
Color	: Clear. Colorless.
Odor	: Characteristic. Alcohol-like.
Molecular weight	: 32.05 g/mole
Molecular formula	: C-H4-O
рН	: Not available.
Boiling/condensation point	: 64.5°C (148.1°F)
Melting/freezing point	: -97.8°C (-144°F)
Relative density	: 0.792
Vapor pressure	: 12.9 kPa (97 mm Hg) [20°C]
Vapor density	: 1.11 [Air = 1]
Volatility	: 99.9% (v/v)
Odor threshold	: 100 ppm
Evaporation rate	: 2.1 (butyl acetate = 1)
VOC	: 100 % (w/w)
Solubility	: Soluble in the following materials: water

Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Hazardous polymerization	: Under normal conditions of storage and use, hazardous polymerization will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.
Materials to avoid	 Highly reactive or incompatible with the following materials: oxidizing materials. Reactive or incompatible with the following materials: metals and acids.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Conditions of reactivity	: Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and oxidizing materials. Dangerous fire and explosion risk. Container explosion may occur under fire conditions or when heated. Vapor may travel a considerable distance to source of ignition and flash back.
	Highly explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and oxidizing materials.

	Acute LC50 >100000 ug/L Fresh water		96 hours

Other adverse effects

: No known significant effects or critical hazards.

13. Disposal considerations

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national and local laws and regulations.
